How to Measure your Belt Length

YOUR DRESS BELT

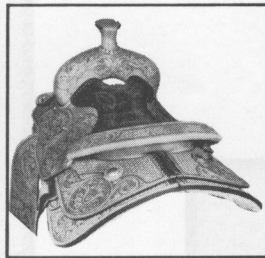

Please specify your exact belt size. When determining your size from your older trouser belt, measure from the most used hole to the outer edge of the buckle.

YOUR GUNBELT accommodates your holster and accessories and will possibly be worn at angles or over various types of clothing, so please allow for this when stating size required. Most belts are usually made to order and cannot be exchanged

WESTERN

#701

We pride ourselves on the high quality of our western holsters. Please contact us for further information and illustrations.

We also make, and import from the U.S.A., professional quality Western saddlery & tack.

IMPORTANT INFORMATION

As this brochure contains only a selection of our products, please refer to the price list for details and specifications of the full range.

Caution!

Only use your ESCORT holster with the specific gun and barrel length for which it was designed. Unless otherwise stated, our holsters are made for standard weapons. In some cases, variations such as grip adapters and trigger guard spurs, etc., could cause improper fitting. When ordering, please inform us of any modification to your gun. Never use trigger shoe equipped handguns with any holster.

Cocked Hammers

Unless otherwise specified or requested, all holsters for Auto's that incorporate safety strap or thumb-break, are fitted with hammer down. The "Cocked and Locked" position increases the risk of accidental discharge and should only be used by the experienced or professional.

Barrel Length

AUTO'S are measured from the rear of the ejection port to the muzzle.

REVOLVERS are measured from the face of the cylinder to the muzzle.

FORWARD RAKE = MUZZLE FORWARD
BACKWARD RAKE = MUZZLE BACK

Leather Care

If your ESCORT product becomes scratched or dry, apply leather dressing to the exterior followed by a lacquerless wax polish. Be careful when applying neatsfoot or saddle oil as this will soften and darken the leather.

We can supply on request, small jars of the same blended oils we use in production. Also available is our Carnauba Cream wax polish.

Colours

We use only top quality full grain leather which we dress with oils and waxes to produce a natural finish.

Our standard colours are Oiled Tan with White Stitch or Black with Black Stitch. Also available is Oiled Tan with Black Stitching and Edges. All press studs are black as standard unless nickel is requested. Buckles are top quality nickel plated, made in U.S.A. The same buckles are available in black, non-reflective finish at an extra charge.

Disclaimer of Warranty

ESCORT GUNLEATHER takes no responsibility as to the use of the product sold. The determination of the fitness or suitability of any such product is the responsibility of the buyer as is the risk as to the quality and performance of the product.

We reserve the right to alter and improve the design of any Escort product without notice.
